dotworkz systems

Keeping Electronics In and Vandals Out

Harsh weather environments are not the only threat against outdoor camera deployments. Malicious vandals and senseless sabotage can cause a significant amount of damage to sensitive electronic equipment. To keep integrated components secure, Dotworkz has engineered a specialized bolt system and tool that keeps camera systems inside the enclosures, and out of the hands of thieves.

The Dotworkz Tamper Resistant Fastener Kit can be integrated in all Dotworkz housings, including the D2, D3, and S-type models, and adds another element to the Dotworkz standard of protection.

Tamper Resistant

KT-TRFP: Dotworkz Tamper Resistant Fastener Kit

Features:
- Includes Tool and 12 fasteners
- Compatible for Integration with the Dotworkz D2, D3, & S-Type enclosures
- Replaces standard fasteners easily and effectively
- Specially engineered Captive Machine Screws
- Meets all Tamper Resistant Contract Upgrade Specifications
- Replaces standard Phillips drive fasteners
- Further protection against vandals, sabotage, and theft
- Captive-threaded fasteners for secure mounting
- 18-8 Stainless Steel construction for durability

Description:
Dotworkz Tamper Resistant Fastener Kit (KT-TRFP) adds a further degree of protection to the already durable and "vandal-tough" Dotworkz enclosures. By replacing standard Phillips head screws, the specialized design of the Dotworkz Tamper Resistant Fastener Kit will meet all tamper resistant contract upgrade specifications and will keep expensive integrated electronic components secure from vandals, sabotage, and theft. The Tamper Resistant Fastener Kit is available for integration in all Dotworkz housings, including the D2, D3, and S-Type enclosures.

Specs:
Shipping Weight:
1 lbs (0.5 Kg)
Shipping Dimensions:
7"x 9" Padded Envelope
Includes:
6 Captive #10-32 Fasteners and Torx Security Head Tool
Material:
Stainless Steel 18-8

Standard Fastener

Tamper Resistant **Fastener**
