

Overview

The Dotworkz KT-24VAC Step Down Transformer Kit is designed to easily integrate any 24 VAC powered camera into Dotworkz Enclosures. The KT-24VAC provides the added capability of powering cameras or other integrated power Accessories via 24VAC, when 120 VAC power is provided to housing, and allows the simple integration in powering these 24 VAC camera & accessories into any Dotworkz housing.

Can be removed from the provided bracket to mount into S-Type series housings to add 24 VAC powering capability to integrated devices when 120 VAC nominal power is available to power Dotworkz Housing for Indoor & Outdoor deployments.

Features & Specifications

- Designed to add 24VAC powering options when installing Axis P55 & Q60 indoor Series camera installation into all Dotworkz D-Series Housing models
- Input: 120 VAC, Output 24 VAC, 60 Hz, 40VA / 48W, 1.67 Amp rated
- Class 2 Transformer rating
- Operation Temperature: -20°C to +60°C, Storage: -40°C to +70°C
- Transformer UL Listed and RoHS compliant
- Includes compact 3-prong outlet pigtail (KT-ACSO) for easy AC wiring into Dotworkz Housings
- Includes Secure Wiring Euro-block Screw Terminals for input and output
- Low Cost and economical power solution

Applications

KT-24VAC is a Power Accessory that can be used installed into Dotworkz Housings, or as an indoor power solution for 24 VAC powered cameras and accessories.

UL rated Transformer provides a safe and reliable power supply solution for many common 24 VAC only cameras and accessories, when 120 VAC only, nominal power is available.
