

Protects against damage caused by moisture

Dotworkz Rechargeable Humidity Removal Packs are a safe and cost-effective way to keep cameras free from damage caused by condensation. Each unit comes with built-in indicator crystals which turn from blue to pink signaling when saturation has occurred and reactivation is needed. The Humidity Removal Canister Pack is reusable, can be recharged in an ordinary kitchen or toaster oven, and is safe to use with all electronic equipment.

KT-HRC1: Dotworkz Humidity Removal Pack

Description:

Dotworkz Humidity Removal Canister Pack ensures protection against rust, mildew, and corrosion caused by high levels of moisture in the air. The Humidity Removal Canister Pack contains 40g of Silica Gel Desiccant — a hydro-sorbent substance that “drinks up” moisture and creates a protected state of dryness of up to 3 cubic feet of enclosure air. It improves performance of any sealed enclosure by keeping the inside lens from fogging, and is effective in any model of Dotworkz housings.

remote video solutions
